3Bears

Porridge - just right

"**Porridge - just right**" - this is the claim under which 3Bears has been revolutionising the breakfast routine in German-speaking countries since 2016: with porridge - always **without added sugar** and **100% plant-based** - the German-British founding couple Caroline and Tim Nichols have built up their brand in recent years: Based on the British porridge tradition, the products are developed and produced in Germany - with the local oat flake as the "superfood" base. All 3Bears Porridge varieties have no added sugar (only fructose), have the **highest fruit content on the market** (sometimes more than 30 per cent) and are vegan (as long as they are prepared with water or plant-based milk alternatives).

With the "strong-as-a-bear" **Pocket Porridge** bars, 3Bears also offers the first "Porridge for your pocket": a delicious meal - especially satiating thanks to the high oat content and, of course, vegan.

A lot has happened in just a few years: Made famous by the TV show "Die Höhle der Löwen", the young company now has sales in the millions and is available in more than 6000 supermarkets in Germany.

Sustainability is a top priority at 3Bears. All products are packaged in **Green PE film**, a bio-based plastic made from sustainably grown sugar cane. In addition, the **plastic used is compensated** with "Plastic Bank" which means that more plastic is returned to the recycling cycle than is sold. With "**1% for the Planet**", 3Bears also donates 1% of its annual turnover to the protection and preservation of our environment.

Incidentally, the name of the company and brand comes from the English fairy tale "Goldilocks and the Three Bears", in which Goldilocks chooses the one that is "just right" for her from three different porridges.

Baci Perugina

Crafted with love in Italy since 1922

In the heart of Italy, lies the lush region of Umbria and the city of Perugia, where you will find Perugina®, home of the Perugina® Chocolate Masters and the famous factory, a symbol of quality chocolate and tradition for more than a century. Its secret is in the passion with which new flavors and combinations are experimented with every day, creating the highest quality product and irresistible flavors for Baci® Perugina®, one of the most loved and widely known chocolates around the world.

In 1922, Luisa Spagnoli, the creative genius behind Baci® Perugina®, had the idea to create the confection that we know today by blending chocolate with a ground hazelnut cream, mixing in some chopped hazelnuts, crowning the confection with a whole hazelnut and then covering it in fine precious dark chocolate. The dark chocolate used to cover Baci® is so special and unique that it is named after her: Luisa®. Nearly 100 years later, the original recipe and process remains unchanged. The process involves the same expertise and experience from the first day it was made to ensure excellence from the cocoa selection to the careful steps by which the chocolate is made.

Even today, each Baci® Perugina® is personally checked before being wrapped.

The proprietary recipe for the unique chocolate results in a flavor and texture that is both intense and velvety and is closely guarded by the masters of the Scuola del Cioccolato® Perugina® (Perugina® chocolate school).

According to legend, the first love note appeared in the 1930s, inspired by Luisa Spagnoli, the founder of Baci® Perugina®, who would send chocolates wrapped in love notes to her lover, Giovanni Buitoni.

Baci® Perugina® are special not only for their unique recipe, made with natural ingredients and the highest quality raw materials, but for the sentiments of love, written on notes that wrap each chocolate, with beautiful messages of love, friendship...

BBQUE

From barbecue fans for barbecue fans

From the kitchen pot to mass production

Take the devotion to American barbecue, the enthusiasm for good meat and a sense of really good taste, and combine it with inventiveness and the courage to create unique BBQUE sauces. The result? A uniquely good BBQ sauce! The first tests are put through their paces among close acquaintances.

From a misunderstanding to series production

It quickly became clear: These BBQUE sauces refine any grilled food in a unique way! It was our duty to share them outside our circle of acquaintances for the common good. Inspired by this idea, the BBQUE project was launched in 2011. From the 300 bottles initially planned, 3000 bottles are produced by mistake due to a communication problem - the birth of the BBQUE brand! Even without any previous experience in distribution, the bottles are quickly sold, because the feedback is sensational and within a few days all bottles are sold.

Homemade sauces on a large scale?

The huge demand soon requires the help of professional partners who can fill the "homemade" recipes with identical character in large quantities. A real challenge, since the BBQUE sauces contain only natural starches, no preservatives or concentrates, and are not easy to produce on large lines due to the high-quality base of fruit and tomatoes. But true to the motto "nothing is impossible", this project succeeds nevertheless.

This is how the BBQUE sauces were created, which are able to take almost every griller's heart by storm!

Darbo

An Austrian family tradition

d'arbo
Since 1879

The Darbo family began making jams and syrups from fruit in 1879. Darbo steadily gained market share and expanded its range in both the foodservice and food retail industry and became the market leader for jams and honeys in Austria, not least because of its loyal customer base.

Its success in Austria served as an encouraging confirmation that its strategy was working, so the company also ventured the odd glimpse abroad too. The company was now enjoying growing success supplying its fine jams, honeys and syrups to shops outside of Austria as well.

Darbo is now a well-known medium-sized family firm that makes high-quality products at three sites in Tyrol for restaurants and hotels as well as for the foodservice and food processing industries in Austria and abroad.

Dayong

ORIGINAL
DAYONG
GEWÜRZBEREITUNG

Dayong - die Asiatische Gewürzmischung und der klassische Begleiter für jede Küche seit den 60er Jahren.

Heute wird oft von "eurasischer" Küche geschwärmt ! Dayong ist eine Würzmischung - unter anderem aus Paprika, Pfeffer, Sesam, Chillis, Ingwer und Curry - die genau diesem Trend entspricht. Die Ausgewogenheit der Gewürze lässt ein Kombinieren asiatischer und europäischer oder eben "eurasischer" Kreationen zu. Ob Fleisch-, Fisch- oder vegetarische Gerichte, pikante Aufläufe, Saucen oder Suppen: es gibt kaum Kreationen, die sich nicht mit Dayong abschmecken liessen.

"Um unsere Original Dayong Gewürzzubereitung herzustellen, verwenden wir wertvolle Rohstoffe, die wir in komplexen Verarbeitungsvorgängen weiter veredeln. DAYONG verleiht Ihren Speisen sein charakteristisches Aroma, ohne den Eigengeschmack von Gemüse, Fisch und Fleisch oder den frischer Kräutern, wie Koriander, Salbei und Basilikum, zu dominieren. Diese Harmonie wird durch die Rezeptur gewährleistet, die aus der **Erfolgsküche Yuon Ling Tschangs** hervorgegangen ist und sich nun bereits seit Jahrzehnten bewährt."

Del Duca Aceto

The original from Modena - the first aceto to be sold in Switzerland

The company was founded in 1891 by Adriano Grosoli and is now run by the fifth generation with a great love of tradition.

Aceto Balsamico del Duca di Adriano Grosoli s.r.l. is located in Modena and belongs to the Consorzio Aceto Balsamico di Modena. The Consorzio Aceto Balsamico di Modena controls and guarantees a correct production process, correct ageing and maturation as well as declaration of the Aceto Balsamico.

Del Duca is IGP certified "protected geographical indication".

The first mention of this Aceto di Modena goes back to the year 1046. For the Tradizionale, the red Lambrusco and white Trebbiano grapes, naturally only from Emilia Romagna, are boiled down over an open fire to about one third. The "Mosto cotto" spends the long period of maturation (Vecchio at least 12 years, Extra Vecchio at least 25 years) in wooden barrels. 75 kg of grapes yield approx. 1 lt of Tradizionale.

Firelli

Italy's hot sauce

The success story of the chili pepper in Italy began in 1492, when Christopher Columbus brought it to Italy from Haiti. First used purely as a decorative element, the fine pod quickly found its way into Italian cuisine, where it appeared in the first cookbooks as early as 1664. Since then, it is impossible to imagine Italian cuisine without this product: nowadays, practically every pizzeria in Italy works with this spice, whether in the form of flakes or pickled in olive oil.

Firelli Hot Sauce is beautifully packaged in an iconic, cone-shaped glass bottle with a stunning blue cap modeled after an old Italian fire extinguisher, offering a modern twist on a classic Italian tradition.

The products are produced by Agricor s.r.l. - a family-owned business in the town of Langhirano - just outside of Parma. The region is famous for its food production, including Parma ham, Parmesan cheese and more.

Firelli stands out from the crowd of other hot sauces that are too spicy or too vinegary, filling a gap in the market for an **all-natural Italian hot sauce**. Firelli provides an unforgettable pizza taste and is a healthier substitute for chili oil - just a few squirts is all it takes to give pizza a spicy kick!

Approximately 30-40% of all pizza consumers use a hot sauce for their pizza. Today, these are still mostly sauces from the Tex-Mex area, but **on an authentic Italian pizza also belongs an equally authentic hot sauce from Italy!**

But the products of Firelli are suitable for much more than just pizza and also give the pasta, a sandwich, eggs or the BBQ the final kick. **This makes Firelli an indispensable part of any modern kitchen.**

Flor de Sal d'Es Trenc

The salt from Mallorca

Located in the southeast of the island of Mallorca are the unique surroundings of Salinas d'Es Trenc. This is a protected natural landscape of dunes with unspoiled wetlands and one of the most beautiful beaches. The crystal-clear, pure sea water, low humidity, as well as plenty of sun and a gentle sea breeze provide ideal conditions to produce high-quality salt. These ideal conditions were already used by the Phoenicians and Romans in the 4th century BC to extract valuable sea salt.

Today, we are following in the footsteps of the many generations before us, continuing the tradition and using this natural environment to extract Mallorca's white gold. When harvesting this precious natural resource, we always base our work on our most important principles: great respect for nature and the preservation of fauna and flora. In our salt flats, which are only a few kilometres from the coast, we have made it our mission since 2003 to work every day to preserve the values of Salinas d'Es Trenc. The salt is scooped from the surface of the salt flats responsibly, by hand, only during the summer months and with respect for the natural conditions.

All these traditions, principles and values are combined in a naturally pure sea salt of excellent character and quality. The harmonious taste of the Flor de Sal d'Es Trenc salts is unique, crunchy, a little sweet and gives an excellent flavour to all typical recipes of Mediterranean cuisine.

Gallo

Over 100 years bringing quality and perfection to your table

Founded in Portugal in 1919 by a visionary named Victor Guedes, Gallo is synonymous of Portuguese soul and tradition. At Gallo, we are passionate about olive oil since our origin, and we have been working in this magical world for 100 years.

Today, we are the **first Portuguese olive oil brand in the world**, and the **fourth in the world ranking**. The reputation of our olive oils is built on a solid foundation of quality and a constant desire for new knowledge. For this reason we work directly with producers, millers, researchers, and blenders to learn more about olive oil every day, and thus constantly improve the quality of all our products.

But our passion does not end with olive oil: we also explore the worlds of vinegar and piri-piri, which we carefully produce, based on a fundamental principle that we never forget: the unquestionable quality of our products. Our ambition, in everything we produce, is to provide authentic flavors that make a difference in people's recipes. That is why, at Gallo we believe that life is to be lived through culinary experiences. Food is all about sensations and emotions. For us, creating and tasting a dish feeds the soul, brings happiness, and provides pleasure. At meals, people come closer to each other, memories are shared, and relationships are reinforced.

We are proud to know that we are present in the kitchens and tables of thousands of consumers around the world, providing a tasteful moment shared with family and friends.

Gazosa 1883

The first Gazosa without artificial colourings

Gazosa is a clear, carbonated lemonade from the canton of Ticino. When the bottles are opened, there is a delightful pop, which is why Gazosa used to be popularly known as the "poor man's champagne". Gazosa 1883 is the gourmet's Gazosa and is characterised by natural flavours and no artificial colouring.

The name "Gazosa 1883" pays tribute to the first gazosa factory in Mendrisio, which was put into operation in 1883. Thanks to the passion that has been preserved over the years and passed down through the generations, together with the recipe that skilfully combines flavours and bubbles, the result is a particularly tasty drink that goes with every moment of consumption.

Iliada

Authentic, fully aromatic Greek olive oil

In the first years of its existence, the company mainly processed olive oil from the Kalamata region. The success and the demand are steadily increasing. At the same time, the company ensures that the original vision of offering products with exceptional properties and traditional taste has not been disregarded.

In this sense, the president, Mr. Dimitrios Gyfteas, tastes and evaluates every single portion of olive oil that comes into the factory personally and shows his commitment, his deep knowledge and his love for the olive tree and its fruits. The same passion is shared by vice president and managing director Ms. Gyftea, who travels around the world and supports the "liquid gold".

The Greek olive oil producer has been processing, packing and selling its precious goods for over 50 years. It can count on 30 years of experience in the export business. Today, its Greek olive oil is exported to over 50 countries. Therefore, it is one of the largest olive oil exporters in Greece.

The production facility is located in Kalamata which is the internationally known growing area of the premium Kalamata olive oil.

Jack Daniel's

The finest ingredients make the best quality product

Ya see, down in Lynchburg Tennessee ol' Mr. Jack Daniel was well known for his annual summer BBQ parties. It was no secret that the secret ingredient back then was Jack Daniel's Tennessee Whiskey. Today, we're proudly continuing that old tradition with our brand-new line of Jack Daniel's BBQ sauces in a classic glass bottle.

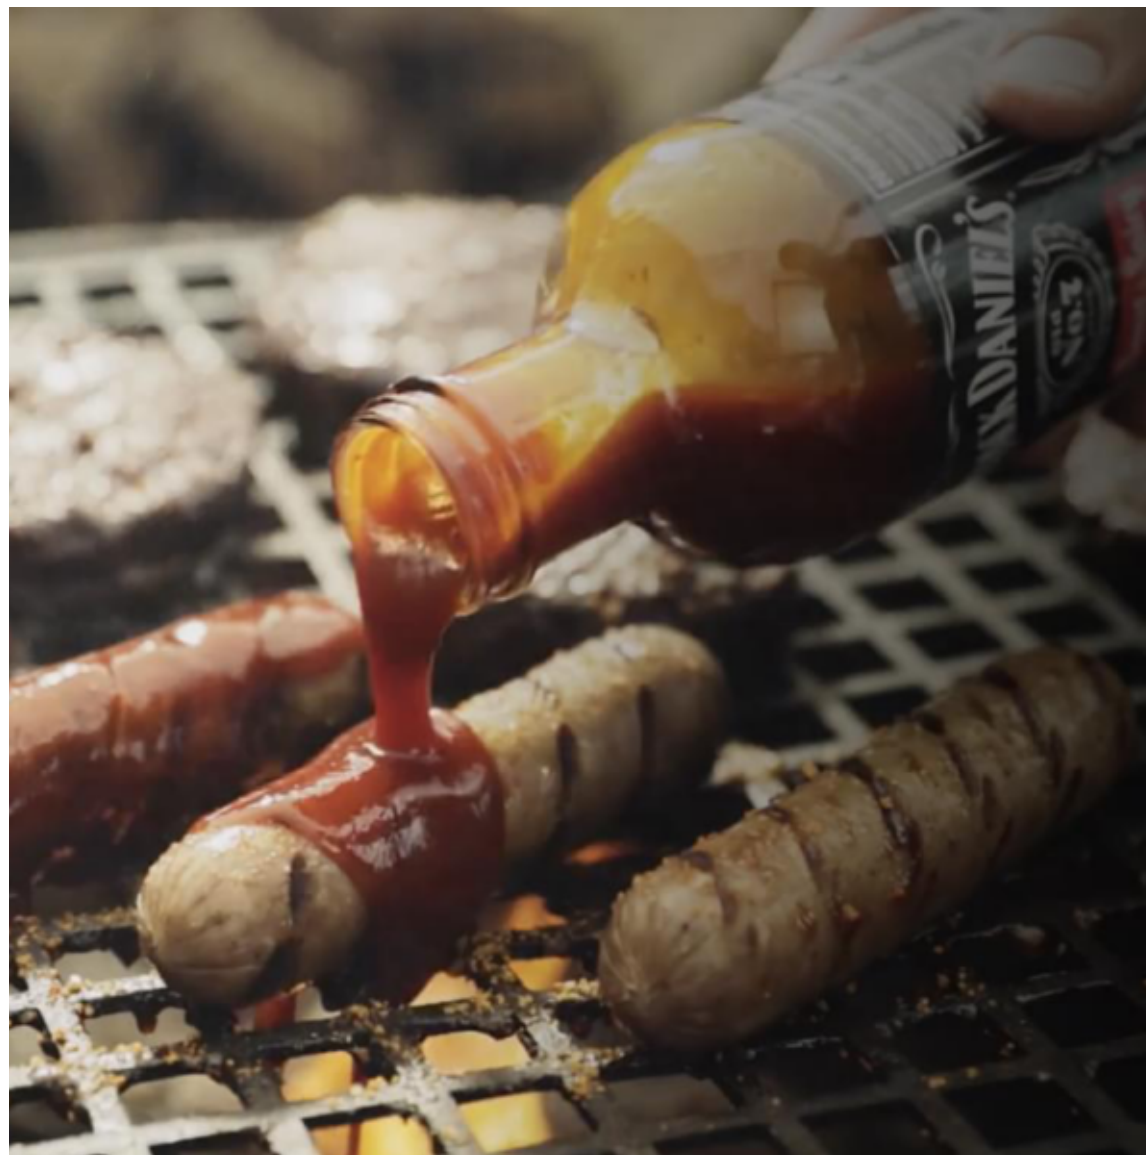

Every day we make it, we'll make it the best we can

We strictly follow the old traditions of Mr. Jack Daniel whose motto was "Every day we make it, we'll make it the best we can". Every bottle of Jack Daniel's Original BBQ sauce is of course made with a fine touch of Jack Daniel's Tennessee Whiskey that imparts a unique flavor. These sauces are made using only finest ingredients and traditional kettle cooking methods.

The sauces

- **Original BBQ sauce** - A true classic
Jack Daniel's Original BBQ Sauce is a real BBQ classic - well balanced notes of dark brown sugar, ripe tomato, apple cider vinegar, and the unique flavor of Jack Daniel's Tennessee Whiskey! An authentic American original, classic with a balanced flavor and a robust finish.
- **Sweet & Spicy BBQ sauce** - Kick it up a notch
For the extra "kick" try Sweet & Spicy BBQ Sauce and enjoy a bit of excitement with your meal or appetizers. This tasteful blend of a little bit of heat and a little bit of sweet delivers zip and zing but won't overpower your pallet.
- **Honey BBQ sauce** - The bee's knees
A tasty BBQ sauce highlighting the fine nature of real bee honey. Complex in taste with various notes of pineapple, tamarind and a lovely peppery finish. Jack Daniel's Honey BBQ sauce delivers the discreet notes of honey from sustainably raised bees.

Jolly Time

Original American popcorn

We know popcorn better than anyone. Why? Because "Jolly Time" is the original brand name of popcorn in America.

"Jolly Time" is synonymous with the great taste of microwave popcorn and is available in a variety of flavors.

Founded in 1914, the "American Pop Corn Company" is the oldest producer of popcorn in the industry and is still owned by the founding Smith family!

The typical American popcorn also has its loyal fan base in Switzerland. The microwave packs with three portions can be easily and freshly prepared in the microwave oven. Choose between four different varieties and experience an incomparable taste sensation! Of course, you can still get popcorn in a bag, which you can prepare traditionally in the pan.

LACROIX SOUPS should not be missing from any menu. These high-quality, classic soups from LACROIX are made by chefs. They use the typical recipes of the classic cuisine and selected ingredients in gentle procedures. So that our soups taste as you expect them to taste, just like homemade!

Eugen Lacroix (1886-1964) was a Baden restaurateur who moved to Frankfurt am Main in the early 1920s. His curiosity for culinary delights gave him the idea of pre-cooking specialties that required a lot of effort in the kitchen, so that professionals and hobby chefs alike would have an easier time delighting their guests. In 1921, he founded a small business for this purpose, which initially produced truffled foie gras pâtés. Other delicacies followed, and just four years later his idea had grown into an international delicatessen company with 350 employees. An ideal of culinary creativity that guides Lacroix to this day and has firmly established him as a leading brand in the delicatessen segment.

Leib und Gut

Fit with wholefoods

In 1979, the Stones' song "Time is on my side", already an oldie back then, was not decisive for the foundation of Leib und Gut-Vollwertkost, but time was on our side.

Environmental pollution with harmful effects on air, water, soil and nutrition were already topics that moved interested and committed people at that time.

So we dared to start selling household grain mills for preparing a wholesome diet with fresh grain muesli cereal and freshly milled flour for making wholemeal breads. This also required the necessary cereal grains such as wheat, rye, spelt, etc. But not just grain: it had to be grain from organic cultivation! At that time, this was not a matter of course. Only a relatively small circle of consumers knew what was meant by organic farming.

With the expansion of the product range, the wholefood brand "Leib und Gut" could also be introduced in the food trade. In a market segment, mind you, that was previously unfamiliar with the sale of organically grown products! In addition, products such as rice wafers with various chocolate coatings, honey cakes, honey wafers, muesli bars, but also new muesli mixes such as with amaranth, spelt bran, quinoa and wholemeal pasta in organic quality were largely unknown at that time in the conventional food trade and among consumers.

However, the demand for our "Leib und Gut" products was good and above all sustainable right from the start. After some time, this sustainability also prompted various competitors and food wholesalers to take advantage of market opportunities in the organic food sector. How our idea at that time developed can be seen today in every supermarket with hundreds of articles in organic quality. Nevertheless, we have been able to hold our own in the market with the brand "Leib und Gut" for over 40 years.

Longkou

Kommen Sie mit auf eine kulinarische Reise nach Fernost.

Die Produkte von Longkou sind sehr vielseitig einsetzbar und für die asiatische Küche unverzichtbar. Glasnudeln werden nur aus Stärke und Wasser hergestellt. Die Stärke für Glasnudeln kann von Erbsen, Mais und Mungbohnen stammen. Aus den nierenförmigen Samen der Mungbohnen wird mit einer Trocken- und Nassmahltechnik der klebfähige, süss schmeckende Grundstoff gewonnen und mit Wasser vermischt. Die ebenfalls Glasnudeln genannten Dangmyeon aus Korea werden hingegen aus Süsskartoffelstärke hergestellt.

Glasnudeln aus Mungbohnenstärke bestehen nach Packungsangaben aus ca. 88 % Kohlenhydraten und 2,5 % Ballaststoffen und enthalten kein Salz, kein Fett und kein Eiweiß.

Glasnudeln sind nicht mit (den eher matt-weißlichen) Reisnudeln zu verwechseln.

Merì

The meringues of the doge

Our confectionery has been producing exclusively artisan confectionery products since 1983. We have developed the "Meringues del Doge", which have as a base the classic meringues from the Republic of Venice, produced at that time according to ancient tradition by pastry chefs and served at the court of the Venetian Doge.

Everyone knows meringues, but our meringues surprise with a new shape and the most versatile flavors.

Mr. Mallo

The marshmallow expert

Marshmallows are one of the earliest types of sweets known to mankind. The Egyptians were known to make sweets from the sap of the root of the marshmallow plant (*Althaea officinalis*).

Since the 1950s, marshmallows have been made on an industrial scale with the three main ingredients of sugar, glucose syrup and gelatine.

Mr. Mallo - Van Damme guarantees fluffy marshmallows thanks to fully automated, state-of-the-art production lines. Founded in 1907 as an artisan production company, Mr. Mallo Group now produces over 20.000 tonnes of marshmallows annually through its four state-of-the-art production lines.

Mr. Mallo is the perfect partner for retailers around the globe for their private label marshmallow projects.

Nissin

The origin of a revolutionary idea

"When people have enough to eat, peace will reign in our world" - this conviction of Nissin Food's founder Momofuku Ando formed the cornerstone of an ingenious idea: the world's first instant noodle dish.

His determination grew out of the misery shortly after World War II, when people often had to wait in long lines to buy food on the black market. He wanted to change that - and those changes became the founding principle of Nissin Foods.

The introduction of chicken ramen in 1958 led to a complete transformation of the market and the industry. Since then, instant noodles have become an integral part of food culture around the world. With its global production, Nissin Foods aims to develop new products to help solve the increasingly serious problem of global food supply. In line with the principle of "producing balanced and safe food serves society".

THE NISSIN QUALITY GUARANTEE: "Quality is our philosophy."

As a responsible food manufacturer, food quality and safety are top priorities at Nissin Foods. We focus all our efforts on making products that earn customers' trust. Because we take their concerns and wishes seriously, the highest level of food safety is our greatest commitment.

Leidenschaft für Schokolade und zwischen Technologie und Tradition: Sorgfältige Auswahl der besten Rohstoffe, Vereinigung von Handwerk und fortschrittlicher Technologie, Liebe und Engagement für die Schaffung echter Produkte und hoher Qualität. Dies sind die Zutaten für den Erfolg von Aldea. Das Unternehmen mit Sitz in Dronero, einem kleinen mittelalterlichen Dorf am Fuße der majestätischen Cuneo-Alpen, ist der Erbe der Schokoladenkunst des Konditors Giuseppe Galletti, der 1905 das "Droneresi" erfand. Der "Droneresi", der auf der Internationalen Weltausstellung in Turin verliehen wurde, erhielt Giuseppe Galletti den höchsten Preis mit Diplom und Goldmedaille: die exquisiten Schokoladen mit weicher Creme und Rumlikör wurden zu den Begründern der glücklichen Tradition der Pralinen Provinz Cuneo. Die Herstellung von Aldea ist mit der jahrhundertealten piemontesischen Konditoreitradition verbunden und wird dank der Leidenschaft und des Engagements der Familie Martini, der Eigentümerin der Firma, mit besonderer Sorgfalt nach geheimen Rezepten ausgeführt, die von Vater zu Sohn weitergegeben wurden. Heute präsentiert sich Aldea als eine stolze industrielle Realität, die mit den modernsten Produktionstechniken ausgestattet ist und in der Lage ist, Produkte zu entwickeln, die der Tradition entsprechen und auf den Geschmack der Öffentlichkeit achten.

Novish was founded in 2019 by Katja Busser, Maiko van der Meer and Paul den Dulk. Together they have over 75 years of experience in the food industry and have used their knowledge to make great progresses in the international market. This development affects all life on earth. **With Novish products, we want to restore the balance in nature.** We do this by sustainably producing the tastiest plant-based fish and helping to reduce overfishing, bycatch, farmed fish practices and, of course, overall environmental damage.

With Novish's 100% plant-based fish substitutes, you as a consumer are creating balance in your daily diet while helping to restore balance in the ocean.

Pasta Di Martino

Since 1912 - Pasta di Gragnano IGP

Gragnano, the city of pasta, is located on the Sorrento Peninsula in the Campania region. Not far from the Amalfi Coast and surrounded by the Lattari Mountains, characterized by a mild climate with the perfect mix of sun, sea breezes and humidity, the ancient city enjoys a particularly favorable position and ideal conditions for the production of pasta.

Di Martino pasta is made only from the best exclusively Italian durum wheat semolina, mixed with pure local spring water from the Forma spring, drawn through rough bronze molds and dried slowly at low temperature, as required by the regulations for Pasta di Gragnano IGP.

In collaboration with the designer duo Domenico Dolce and Stefano Gabbana, the **Dolce & Gabbana - Special Edition** has been created with the slogan: "La Famiglia, la Pasta, l'Italia!". Excellent pasta meets excellent design!

Patak's

Discover the taste of India

Die Patak's-Story

Patak's ist die Geschichte meiner Familie, angefangen mit meinem Grossvater L.G. Pathak. 1925 als Kind armer Farmer im indischen Bundesstaat Gujarat geboren, kam er nach dem Tod seines Vaters nach Kenia, wo die Familie sich ein besseres Leben erhoffte. Sie öffneten ein kleines Geschäft, das indische Süßigkeiten verkaufte, hauptsächlich an die vielen indischen Immigranten, die sich nach heimischen Produkten sehnten.

1956 veränderte sich die politische Lage in Kenia und mein Grossvater zog mit seiner Familie und 5 Pfund in der Tasche nach England. Die einzige Arbeit, die er finden konnte, war die eines Kanalreinigers.

Da kam meine Grossmutter auf die Idee, indische Süßigkeiten und Snacks herzustellen. Sie fertigte diese in ihrer winzig kleinen Küche an. Das sprach sich herum. Es kamen immer mehr Kunden und bald lieferte mein damals 10 jähriger Vater die Waren in ganz London aus.

Nach einigen Jahren eröffneten meine Grosseltern ein kleines, indisches Lebensmittelgeschäft. Sie waren sehr erfolgreich, weil sie hauptsächlich nur frische Lebensmittel bester Qualität verkauften.

Den grossen Durchbruch verdankt mein Grossvater aber einem Zufall bzw. einem genialen Einfall wie er immer sagte: Als er einmal zu viel Gemüse eingekauft hatte und nicht alles verkaufen konnte, beschloss er dieses zu Pickles zu verarbeiten. Das wurde ein Verkaufsschlager. Als nächstes verarbeitete er frisch gemahlene Gewürze mit Pflanzenöl, um daraus Pasten mit dem richtigen, indischen Geschmack zu machen.

Damals führte bereits mein Vater Kirit das Geschäft und meine Mutter Meena, eine Lebensmitteltechnologin, entwickelte immer weitere Produkte auf natürlicher Basis. So entstanden auch die beliebten Saucen von Patak's, die indisches Kochen so einfach und schnell machen und dabei den Gerichten den authentischen Geschmack geben.

Patak's hat sich aus bescheidenen Anfängen zu einem de...

Pommel

Apple cider vinegar - a gift of nature

Grapes - apples - potatoes, those are the three original products that have shaped the commercial history of the Zweifel family ever since the company was founded in 1898 by brothers Paul and Emil Zweifel. Grapes for wine, apples for cider and fruit juices (fruit vinegar from 1928), and potatoes for Pomy crisps (from 1958).

In 1964, when François Blöchliger, a gifted naturopath and innovator from the Basel region, presented his invention **Pommel** (from "pomme" and "miel"), a particularly mild and aromatic-tasting premium vinegar, the then head of the firm, Heinrich Zweifel, was extremely enthusiastic. Made from freshly fermented apple juice, this apple cider vinegar is enhanced with honey, whey and herbs. The honey acts as a natural buffer to the acetic acid and protects the stomach lining. The whey and special blend of herbs give Pommel apple cider vinegar its unique character and that certain something. Flash pasteurisation before filling makes preservatives unnecessary.

Pommel is still made according to a family recipe under the expert direction of Urs Zweifel, Managing Director of Zweifel 1898. The exact recipe is a closely guarded secret! And so it is that Pommel apple cider vinegar, with its unique and perfectly balanced taste, has stood for finest Swiss quality since 1969.

- Pommel is harmonious and fruity tasting
- Pommel is very mild and easily digestible
- Pommel is perfect for salads
- Pommel is ideal for drinking cures to strengthen the metabolism

Pommery

A taste for the best

Appreciated by connoisseurs and top gastronomes all over the world:

Founded in 1865, Les Vinaigrieres du Lion became the property of the Chamois family in 1890. The company produced a high-quality vinegar based on white alcohol. The vinegar factory produced and supplied vinegar for the production of Moutarde de Meaux® Pommery® for many decades. In 1949, Pierre Chamois founded the company Les Assaisonnements Briards and took over the production of Moutarde de Meaux® Pommery®.

In the 18th century, there were many mustard factories. Some owned mustard mills, others specialised in milling and sold their flour to artisans who produced the mustard partly for human consumption and partly for medicine and pharmacy.

Mustard was consumed in large quantities because it could be used to mask the taste of food that was no longer too fresh. J. B. Pommery also produced millstones in addition to mustard products. He had inherited the secret of the Moutarde de Meaux® from the canons. In 1980, the Pommery family was the only manufacturer still producing mustard.

The Moutarde de Meaux® Pommery® is still produced today according to the same traditional recipe as back then. Its ingredients are carefully selected according to strict quality criteria. This gives the end product a quality that has often been tried to copy.

Thanks to the quality of the stone pot used, made of the purest material, as well as the non-agglomerated natural cork, the mustard can be stored for a long time and transported to all corners of the world. The brand Les Assaisonnements Briards has always been able to keep its authentic mustard and vinegar production methods secret. Today, the whole world can enjoy products made with their know-how.

Rettergut

For a world without waste

Rettergut has set itself the task of rescuing crooked food. Because: many foods never make it to the supermarket in the first place, but are sorted out beforehand due to shape, size, colour or for technical production reasons. Rettergut tracks down these impeccable but previously unused food raw materials along the production chain and uses them to develop high-quality products that are a sustainable alternative to conventional food in the retail trade.

The **range** currently includes **soups** and **spreads** for example with saved carrots, pumpkins or peppers. The products are often of organic quality, mostly vegan and always with saved ingredients. But more important for Rettergut than the organic certification is that the products contribute in the best possible way to saving high-quality food and of course taste super good.

The more people join the mission of Rettergut, the more can be saved. **Welcome to the team of food rescuers!**

Schamel

Horseradish delicatessen

Horseradish delicatessen since 1846: The founder of the company Johann Wilhelm Schamel (1818 -1898) started in 1846 with a horseradish wholesaler. He established the tradition of collecting recipes and knowledge about horseradish, which were then passed on from generation to generation as a family secret.

We vouch for the finest quality of our products. In principle, we still make our Schamel horseradish today the way Johann Jakob Schamel first prepared it in masterly quality. Of course, today we work with modern technologies, but the basic idea still moves us: namely to produce the best horseradish products. Thus, the name Schamel still stands for the finest quality as well as sustainability for the benefit of the entire value chain

Horseradish was already known in ancient times. This is proven, for example, by a Pompeian wall painting. Cato dealt with this plant in detail in his treatises on agriculture. Originally, horseradish comes from Eastern and Southern Europe. From there, horseradish was brought to Central Europe by the Slavic peoples and spread. In Germany, horseradish is said to have been cultivated only since the Middle Ages. It was initially a medicinal plant and was later used to season food because of its exquisitely spicy taste.

The name "Bavarian horseradish" has enjoyed EU protection since 2008 and is a protected geographical indication.

Serpis

Stuffed olives, a typical tapas variation

Around the 1920s, Alcoy was a town known for its textile industry - a capitalised, educated town in the midst of expansion. It was at this time that Cándido Miró Rabasa, a textile entrepreneur from Alcoy, set up a new venture that invested in the production of a globally popular foodstuff: olives. Each olive was pitted and stuffed by hand, but Cándido Miró Rabasa industrialised the stuffing and packaging of the stuffed olives. Thus, in early 1926, the EL SERPIS olives brand was born. In the course of time, Cándido Miró invented new piercing and stuffing machines in his factory, which he himself helped to develop. Thus, the company has been expanding step by step, but the traditional production process and taste have remained. Currently, SERPIS is one of the leading brand names in the olive sector, spreading taste and tradition all over the world.

Steeves

Steeves - eine Tradition der Exzellenz. Ein ganz natürlicher Sirup mit Ahorngeschmack mit natürlichen Inhaltsstoffen und keinerlei Zusatz- oder Konservierungsstoffe. Seit 1869 ist die Familie Steeves Teil Ahornindustrie, welche in Kanada eine lange Tradition hat. Die Familie Steeves gehörte im 18. Jahrhundert zu den ersten Siedlern im Gebiet von Elgin. Zu dieser Zeit waren es die Indianer, die mit der Kunst, Ahornsirup herzustellen, vertraut waren. Die Legende sagt, dass die Indianer Ahornsirup durch Zufall entdeckten. Ein Indianer warf mutig seine Axt in einen Ahornbaum, der sich in der Nähe ihrer Feuerstelle befand. Während die Frauen am offenen Feuer kochten, begann die Hitze des Feuers den Saft aus dem Baum zu drücken, er floss den Axtgriff hinunter, wo er direkt in die heissen Töpfe tropfte. Von da an sammelten die Indianer diesen süssen Saft und kochten ihn zu einem süssen, dicken Sirup. Heute ist die Herstellung einfacher, aber nicht weniger natürlich. Geniessen auch Sie diesen einzigartigen Geschmack. Purer Geschmack, ganz natürlich produziert und natürlich 100% kanadisch.

The Bridge

La Famiglia Organic

The Bridge, a small family business located in the north of Italy, in the province of Vicenza, has been producing 100% organic drinks, desserts and cooking creams since 1994, all made with carefully selected and certified ingredients according to high quality and traceability standards.

All their products are 100% plant-based, lactose-free, most of them are also gluten-free and all of them are made with spring water coming directly from the Lessini mountains. Why is this important? Plant-based drinks are made up of at least 80% water and about 20% raw materials. Water is therefore the main ingredient in the production of a good tasting vegetable drink.

The Bridge also enhances its products with safflower oil, which contains a significant amount of unsaturated fats and vitamin K... and, to top it all off, no cholesterol. The recipes are also generally as short as possible in order to guarantee a natural flavour derived exclusively from the raw materials; in most cases, the products are also with no added sugars and always without preservatives.

Unfished

Fish in the water, plant on the plate

Unfished® brand was born from our desire to contribute to a sustainable food system for future generations. Unfished® portfolio is unique, inspired by the seafood category, only vegan, ocean-friendly and nutrient-packed.

While the demand for tuna fish is still high, ocean pollution and intensive fishing are threatening and destroying our fragile ocean ecosystem. Unfished® contributes in growing awareness about the need to protect the oceans and its ecosystem by putting plant-based seafood alternatives on the plate.

Nutrition and sustainability are main reasons to choose plant-based alternatives. We considered the importance of the ingredients not only in terms of texture, appearance, mouthfeel but also regarding health. Our Nutri-Score for the Unfished® PlanTuna® products are A or B.

Join our mission to leave the fish in the ocean and taste the future!

Uni Eagle

Spice up your life!

UNI-EAGLE

This fiery-aromatic, authentic chili sauce from Thailand is made only with carefully selected fresh chili peppers.

The unique taste gives that certain something as a dip or to spice up any dish.

Sriracha Mayo Sauce does not contain eggs and is therefore the ideal vegan alternative to the classic spicy cocktail sauce.

Refining

Are you looking for the perfect seasoning for noodle soup or a salad dressing? Simply mix in a dash of hot sauce and give it that certain something.

Topping

Is there anything missing from the meat? But what? The Sriracha sauce gives meat and fish the ideal heat.

Finishing

Give the dish the finishing touch: with the Uni-Eagle Sauce, every meal becomes an aromatic pleasure in no time - whether for a wrap, on bread or on a pizza.

Dipping

The pleasantly thick consistency and the intense and spicy taste of the Asia Chili Sauce make it particularly rich. Use straight from the bottle with the practical dosing cap or be creative and make your own favourite dip!

Urbani

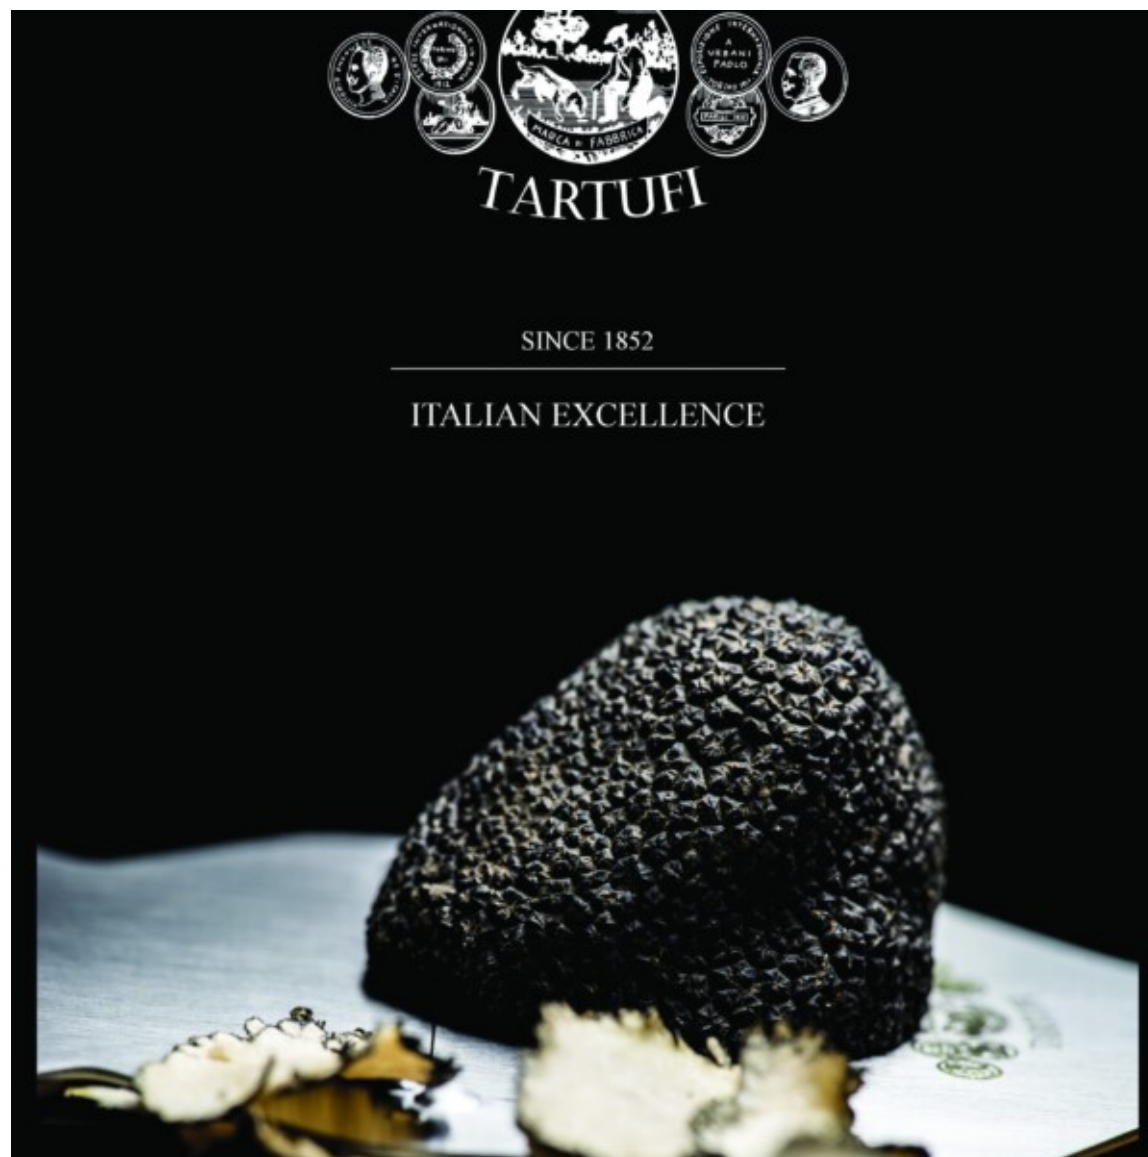

Urbani Tartufi - Altes Familienwissen und moderner Geschmack

Das im Jahre 1852 gegründete Familienunternehmen Tartufi Urbani ist international bekannt und zählt zu den grössten Trüffelhändlern der Welt. Seinen Sitz hat das Unternehmen in der Region Umbrien in der Provinz Perugia. Mit viel Engagement, der Liebe zum Produkt und einem hohen Fachwissen ist eine Produktpalette von außergewöhnlicher Qualität für anspruchsvolle Geniesser aus der ganzen Welt entstanden. So wird der Verzehr der kostbarsten Früchte der Welt das ganze Jahr über ermöglicht.

Die Leidenschaft für den Trüffel und seinen einzigartigen Geschmack, sowie Jahrhunderte altes Wissen kulminieren in etwa 600 verschiedenen Produkten, die alle nur eines gemeinsam haben: Den Trüffel. Urbani Tartufi verwendet nur sorgfältig ausgewählte, qualitativ hochwertige und frische Pilze für ihre vielfältigen Produkte. Und für den Gout ist wirklich gut gesorgt: Feinschmecker und Trüffelliebhaber finden alles, was das Gourmethertz begehrt und es bleibt dabei noch viel zu entdecken übrig. Von frischen Pasta-Saucen aus Bio-Anbau über das klassische Trüffel-Olivenöl, Tapenaden und Pürees bis hin zu spannenden Süßigkeiten wie Trüffel-Pralinen lässt sich alles finden und probieren.

Wer den wertvollen Pilz kennt, der weiss: Es gibt nicht den Trüffel. Sie unterscheiden sich nicht nur in Grösse und Form, sondern auch in Farbe, Geschmack und Herkunft. Der Bekannteste ist der schwarze Trüffel. Als besonders wertvoll und in Italien sehr beliebt gilt der weisse Trüffel, auch als Alba- oder Piemont-Trüffel bekannt. Unterschieden werden die Trüffel oft nach ihrer Ernte- und Heranwachszeit. So findet man oft Pilze mit den Namen Sommer- oder Wintertrüffel.

Yayla

Big Taste, Big Delight

Since our founding in 1979 in Marl, we have carved out a solid place in the German food industry. What began with just a small team back then has grown into a success story that we proudly want to share with you. In our beginnings, we laid the foundation for our brand by offering only five selected products: Tavuk Salam, Sliced Tavuk Salam, 500g Yogurt with 3.5% fat, margarine in 1kg containers, and margarine in 200g cups. These were essential components of Turkish cuisine and quickly gained popularity among our customers. With determination and commitment, we were able to achieve initial profits and successes, which encouraged us to continue our journey. A significant milestone in our history was the move to Krefeld in the 1980s. Here, we not only found new premises but also a strong foundation to pursue our vision further.

The 1990s brought the introduction of our flagship product Suğzme Yogurt, which quickly became a customer favorite and expanded our range with another specialty. But our pursuit of growth and international presence did not stop there. In 1991, we took the step across borders and expanded to Holland. This expansion marked the beginning of an exciting journey. In 2004, we reached the shores of Australia, realizing our first expansion outside of the EU. From there, we quickly conquered many countries around the globe, from the USA to China, thanks to successful trade fair participation and enthusiasm for our authentic products. Our passion for innovation and quality led to the establishment of börek production in 2015, further enriching our range with another delicacy. In 2017, we dared to move into an impressive new building that reflects our values and commitment to excellence. Another highlight was the naming of the Yayla Arena in 2018, which underscored our dedication to tradition, quality, and progress. And today, in 2023, we can proudly announce that our product range comprises more than 400 items. Under our brands ...
