

NEW to the product range – Cultured Foods | 100% plant based, natural, innovative food of the highest quality

In addition to the range of various meat and sugar substitute products, Cultured Foods offers a **real alternative to conventional eggs** with its vEGGs products. Eggs contain animal protein that uses up too many resources. The products from vEGGs are based on **vegetable protein**, which uses **less water**, **less land** and **less energy** and causes **less environmental pollution**. At the same time, the vEGGs are just as tasty as eggs and are suitable for all of your favorite recipes.

Do you like to start your day with a french toast? Do you love a quiche for lunch? Can't resist a delicious crème brûlée in the evening?

Thanks to cultured foods and vEGGs, you can enjoy all of this and create a more sustainable world at the same time.
