

## Organic

### Organic trend

In 2017, the organic food sector achieved a market share of 9% in Switzerland. Greater than ever before. And increasing. This figure shows consumers' acceptance of and appetite for healthy, natural food. The origin of all our organic products and their compliance with quality regulations are checked every year by an external official organic certifying organisation. You can see our up-to-date certificates from CH-BIO and BIO-Knospe [HERE](#).
